Notice of Not Fully Responsive Reply for Applications Under Accelerated Examination	Application No. 10/618,962	Applicant(s) ATSMON ET AL.	
	Examiner MINH D. DAO	Art Unit 2618	

--The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

This application has been granted special status under the accelerated examination program.

The reply filed 20 December 2006 is not fully responsive to the prior **non-final Office action** because of the following reason(s):

1. ☐ The reply includes an amendment that attempts to add claims which would result in more than three (3) independent claims, or more than twenty (20) total claims.
2. ☐ The reply includes an amendment that attempts to present claims not encompassed by the preexamination search.
3. ☐ The reply includes an amendment that attempts to present claims not encompassed by the accelerated examination support document and an updated accelerated examination support document was not submitted with the amendment.
4. ☐ The reply includes an amendment that attempts to present claims that are directed to a nonelected invention or an invention other than previously claimed in the application.
5. ☐ The reply includes arguments or other items that are not limited to the rejections, objections, and requirements made, such as _____ on page _____ of the reply.

6. ☒ Other (including any explanation in support of the above items): Applicant is advised that the reply filed 12/20/06 to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.
The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

The reply has not been entered. Since the above-identified reply appears to be *bona fide*, applicant is give a time period of **ONE (1) MONTH** or **THIRTY (30) DAYS** from the mailing date of this notice, whichever is longer, within which to supply the omission or correction in order to avoid **ABANDONMENT**. **NO EXTENSIONS OF TIME** under 37 CFR 1.136(a) will be permitted.
